Notes:

- Updated April 2026

- R&D expenditures must be made by proponents, interest owners, and/or their contractors and subcontractors. Projects considered for eligibility can include elements such as infrastructure, materials and equipment, and overheads (i.e., salaries and wages, heat and light, office supplies, etc.) and may extend beyond science and technology to include research and development in other areas, including those outside the oil and gas sector.

- E&T expenditures must be made by proponents, interest owners, and/or their contractors and subcontractors. E&T expenditures can include: the establishment of education and training programs; tuition fees at recognized educational institutions; technology transfer; chairs, scholarships, bursaries and fellowships; and work terms/work placements conducted inside or outside the Province, by students enrolled at recognized educational institutions in the Province. Eligible expenditures may extend beyond the oil and gas sector.
