Hi Melissa,

On behalf of the Fish, Food and Allied Workers Union, we have reviewed MultiKlient Invest (MKI)'s responses to stakeholder comments on the *Newfoundland Offshore Seismic and Environmental Data Collection Program (2026–2030)* Environmental Assessment, as requested by the Canada-Newfoundland and Labrador Offshore Energy Regulator. FFAW-Unifor considers MKI's response acceptable.

Notwithstanding, the following expectations are to be clearly upheld in program implementation:

- **Advance notice:** Fish harvesters must be provided with sufficient lead time of planned survey activities to enable operational planning and avoidance.
- **Ongoing communication:** Continuous, timely, and two-way communication with industry is required throughout all phases of the program.
- **Seasonal considerations:** Survey planning must account for peak fishing periods, which typically occur from April through June or July, as well as the post-season crab survey period, which can extend through October and requires equivalent mitigation and avoidance measures.

These elements are fundamental to minimizing interactions with commercial fishing activity and should be reflected in operational planning and execution.

FFAW-Unifor remains available for continued engagement.

Kind regards,

Katie Power (she/her)

Subject: Request for Review: MKI EA Addendum for Seismic and Environmental Data Collection

Hello everyone,

I hope this message finds you well. We greatly appreciate the feedback provided in fall 2025 on MultiKlient Invest (MKI)'s Environmental Assessment Report for the "Newfoundland Offshore Seismic and Environmental Data Collection Program 2026-2030".

On April 1, 2026, MKI submitted an addendum to the environmental assessment report, which specifically addresses the review comments that were forwarded to MKI in November 2025. We are reaching out now to request your review of this addendum and to determine whether you feel the responses provided by MKI have satisfactorily addressed the concerns previously raised.

For your convenience, the EA Addendum Report and the project registry can be accessed at the following links:

EA Addendum: https://www.cnloer.ca/wp-content/uploads/mkiseis2029/MKI-EA-Addendum-.pdf

Project Registry Site: https://www.cnloer.ca/assessments/multiklient-invest-newfoundland-offshore-seismic-and-environmental-data-collection-program-2025-2029/

Thank you in advance for your time reviewing this document. We would appreciate any additional feedback or concurrence **by May 12, 2026.** If you have questions or need further information, please don't hesitate to contact me.

Best regards,

Melissa Moss
