Re: Husky Energy – White Rose Development Project: New Drill Centre Construction & Operations Program Environmental Assessment (CEAR 06-01-17410)

On April 15, 2016, Husky Energy (Husky) submitted to the Canada-Newfoundland and Labrador Offshore Petroleum Board (C-NLOPB) the enclosed report, "*Amendment to the Husky White Rose Drill Centre Environmental Assessment*" (Husky 2016).

The Husky 2016 report is an amendment to the "*Husky White Rose Development Project: New Drill Centre Construction and Operations Program Environmental Assessment"* (LGL Limited September 2006) and "*Husky White Rose Development Project: New Drill Centre Construction and Operations Program Environmental Assessment Addendum*" (LGL Limited January 2007). Husky is proposing to extend the temporal scope for activities associated with drilling within the North Amethyst and South White Rose Extension drill centres to the end of 2020. Timelines proposed for this activity in the 2007 Environmental Assessment (EA) report were between 2007 and 2015, however drilling activities are planned to occur up to 2020.

Please review the enclosed EA Amendment report and forward comments to me no later than **May 23, 2016**. If you have any questions on the attached, I may be reached at 709-778-1431 or via email at dhicks@cnlopb.ca.

Yours truly,
